SUMMARY

AI systems engineer who independently designed and built a production newsroom infrastructure — a 255 GB PostgreSQL + pgvector data warehouse, multi-agent orchestration on the Anthropic Claude Agent SDK, and an adaptive memory architecture — processing real editorial workflows for a live publication serving 6M+ readers. Former fixed-income investment analyst responsible for $200M in allocation decisions on a $13B institutional portfolio; passed Level I CFA exam (top quartile, all sections). Seven-year owner and CEO of a Brooklyn digital media organization: two acquisitions, $150K+ in city contracts, 25% YoY revenue growth.

PROFESSIONAL EXPERIENCE

Bushwick Daily / Brooklyn New Media, LLC *New York, NY*
Owner, Publisher & CEO *February 2018 – Present*

AI Systems & Production Infrastructure

- **Production AI infrastructure:** Designed and built a production system encompassing a 255 GB PostgreSQL 17 + pgvector data warehouse, 1.79M ingested articles from 75+ outlets, 218K processed emails, 8M+ semantic search chunks, 453K participant records, and 10K sender profiles. Full system architecture detailed in published white paper.
- **Multi-agent orchestration:** Engineered a news research system on the Anthropic Claude Agent SDK and LangGraph, with a coordinator dispatching parallel researcher agents (database, email, web) that extract stories with structured 5W analysis from internal and external sources, reducing daily news monitoring from three hours to 15 minutes.
- **Semantic search & ingestion:** HNSW vector indexes delivering sub-100ms search across 8M+ chunks, Reciprocal Rank Fusion combining vector similarity with full-text search, and a 7-step email ingestion pipeline with 16-category AI classification — cutting email triage and article research time by 80%.
- **Adaptive memory system:** Engineered a 4-level scope hierarchy (global, organization, project, sender), deterministic quality gates (10% magnitude, 60% confidence, 5-minute debounce), and an effectiveness tracker that learns from human feedback through the AUDN reconciliation cycle, informed by research on Mem0 and MemGPT architectures.
- **Intelligent email assistant:** Processing 200+ daily emails with context-aware response generation, few-shot learning from 11,332 historical examples, sender profile intelligence across 10K profiles and 453K participant records, and Playwright browser automation for form filling — all with human-in-the-loop approval gates.
- **Multi-model AI pipeline:** Claude for generation and deep research orchestration, Haiku for cost-efficient classification, Gemini Flash for routing, and GPT-4 for specialized tasks; Celery task queues and Redis for background reliability at ~$50–100/month operating cost.
- **Open source:** Published three production systems on GitHub — Adaptive Memory System (AUDN reconciliation, quality gates, effectiveness decay), Email Ingestion Data Warehouse (7-stage pipeline, multi-hash deduplication), and Multiverse Agent Platform (self-hosted LangGraph alternative with parallel path exploration).

Operations, Leadership & Stakeholder Management

- **Government & institutional partnerships:** Built and maintained trusted relationships with NYC Mayor's Office, Department of Education, CUNY Journalism School, LION Publishers, and Craig Newmark Center for Community News across two mayoral administrations, serving as primary liaison for policy coordination, briefings, and collaborative initiatives. Secured $150K+ in city contracts and $30K+ in journalism grants.

- **Team leadership:** Managed a 20+ person cross-functional organization across editorial, sales, marketing, and technology. Led recruitment for 30+ journalists and 4 editors, developed a structured CUNY internship pipeline resulting in 15 full-time hires, and led 3 organizational restructures improving unit economics by 35% while maintaining 98% talent retention.
- **Business development & reach:** Grew the business from pre-revenue through two strategic acquisitions totaling $160K, executing DCF and Gordon Growth Model analysis. Negotiated 100+ local business partnerships, launched the Passport to Bushwick initiative, and achieved 25% YoY revenue growth. Coverage cited by *New York Times*, *New York Magazine*, *Rolling Stone*, and *Gothamist*.

Erie Insurance / Erie Indemnity Company *Erie, PA*
Investment Analyst *January 2015 – March 2017*

- **Portfolio analysis:** Managed a $200M investment portfolio across energy and mining sectors, delivering credit, yield, and duration analysis supporting Erie's $13B total asset portfolio.
- **Sector reallocation:** Spearheaded a $50M reallocation initiative, translating complex market analysis into recommendations for the senior investment committee and achieving 210 bps outperformance.
- **Fund due diligence:** Led diligence on 5 middle-market PE, mezzanine, and real estate funds resulting in $100M+ in capital commitments; maintained relationships with 20+ General Partner fund managers.
- **Macroeconomic analysis:** Built and maintained in-house Inflation Dashboard; presented monthly findings and policy-relevant analysis to the Asset Allocation Committee.
- **Automation:** Engineered VBA/SQL automation for Emerging Market Debt portfolio analytics, reducing reporting cycle by 70%.

Bank of America Merrill Lynch / BNY Mellon *Erie & Pittsburgh, PA*
Management Intern / Performance Analytics *2013 – 2014*

- Analyst rotations across wealth management compliance and institutional performance analytics; developed SQL-based reporting systems for client document review.

EDUCATION

University of Pittsburgh, College of Business Administration *2011 – 2014*
B.S. Business Administration — Finance & Business Information Systems
Passed Level I CFA Exam (2015), Top Quartile in All Sections
