SUMMARY

Full-stack applied AI engineer and founder-operator. Acquired a distressed New York City news publication in 2018 and rebuilt it as an AI-native newsroom, in production since 2026 (<https://alecmeekeer.com/agentive-newsroom-infrastructure>). Previously covered investment-grade oil-and-gas and metals-and-mining bonds as an investment analyst, performing valuation and relative value analysis, and passed CFA Level I. Looking to join a team where I can put production AI engineering and institutional-finance rigor to work directly with clients on their hardest problems.

PROFESSIONAL EXPERIENCE

BROOKLYN NEW MEDIA, LLC / BUSHWICK DAILY

Founder, Publisher & CEO

New York, NY

February 2018 – Present

Applied AI & Production LLM Systems

- Newsroom Automation:** As sole engineer, architected, shipped, and now operate the agentive Python production line that drafts the publication's local news coverage with LLMs: it reads 90+ New York outlets and the inbox daily, clusters coverage into distinct stories, and stages every drafted article for human approval. In its first four months in production, the line produced 500+ published articles, drawing 670,000+ Google Search impressions and 13,000+ clicks.
- Full-Stack Deployment:** Designed and built the newsroom's editorial platform on an auditable, idempotent backend: a FastAPI workflow API (180+ endpoints) driving publish gating and fact-check integration; a web UI where every article is reviewed and published; and RAG search across a corpus of ingested news as well as the publication's own coverage and communications.
- Fact-Checking:** AI drafts risk fabricated quotes and numbers; engineered a fail-closed verification desk that checks every machine-drafted article word-for-word against its sources and blocks publication until the article is fixed; a deterministic presence check, not the drafting model, decides whether a quote passes as verified. In production since June 2026, it has run 5,165 checks over 2,729 drafts, verifying 96,765 claims and 13,735 quotes and blocking 1,014 drafts for correction (as of Sept 2026; <https://alecmeekeer.com/verification-desk.html>).
- Video & Social Pipeline:** Built an async Python pipeline that turns a pasted livestream link into a publish-ready package, gated on human approval: transcription with speaker ID, quotes verified verbatim against the recording, an LLM-drafted article, and rendered reels and carousels; its Instagram posts drew 855,000 views and 63,000 interactions in four months on a 46,000-follower account.
- Data Foundation:** Designed the PostgreSQL warehouse and APIs underneath the editorial platform (285 GB, 1.7M+ articles, 240K+ emails, 16M+ semantic-search chunks on pgvector, sub-second retrieval) and operate them with per-call LLM observability and cost telemetry.

Commercial & Operating Leadership

- Owner-Operator Scale:** Acquired Bushwick Daily (bushwickdaily.com) in 2018 on self-conducted valuation analysis, then a second brand in 2019; operate as sole executive with full P&L ownership across advertising, reader subscriptions, consumer product lines, and institutional contracts.
- Commercial Motion:** Owned the full sales cycle on 100+ deals spanning NYC agencies (Department of Education, Office of the Mayor, MOME) and institutions and brands (NYU Langone, Citi Bike, Airbnb); managed a 20+ person organization; produced sponsored events of up to 600 people.

Government, Policy & Communications

- Government Portfolio:** Built the publication's government relationships across three mayoral administrations, from City Hall to the State Assembly, and maintain them; the publication is a preferred city partner and officially designated NYC media outlet.
- Publication:** Published 7,000+ original articles, with coverage cited by The New York Times, New York Magazine, Rolling Stone, and Gothamist.
- Campaign Communications (volunteer, 2026):** Communications director for a contested New York State Assembly primary; ran messaging and press relations, including rapid response.

ERIE INSURANCE / ERIE INDEMNITY COMPANY

Investment Analyst

Erie, PA

January 2015 – March 2017

- Credit Coverage:** Covered the firm's \$200M investment-grade bond portfolio (oil-and-gas, metals-and-mining) within the \$13B book; performed relative value analysis for primary issuance pricing and allocation; issued buy/sell recommendations on 20+ credits.
- Diligence & Committees:** Led due diligence on \$100M+ in middle-market private equity, venture capital, mezzanine, and real estate fund commitments with on-site GP evaluations and Burgiss benchmarking; authored the monthly inflation overview for the Asset Allocation Committee.

SKILLS

- Applied AI / LLMs:** Claude Agent SDK; multi-model LLM orchestration (Anthropic, Google, open-weight models); LangGraph; multi-agent systems; prompt and context engineering; evaluation frameworks (golden-set regression); agent memory architectures (Mem0, MemGPT); tool use; human-in-the-loop gating; guardrails.
- Engineering & Data:** Python, SQL, TypeScript/JavaScript; PostgreSQL with pgvector and HNSW; FastAPI, React; asyncio; Celery, Redis; Docker; AWS; Scrappy, Playwright; Claude Code; Git.
- Finance:** Credit underwriting and sensitivity analysis; DCF and relative value; LP-side fund due diligence; CFA Level I (passed, top quartile all sections).
- Commercial & Communications:** Enterprise and government sales; procurement and negotiation; government relations; media relations.

EDUCATION & RECOGNITION

UNIVERSITY OF PITTSBURGH B.S. Finance & Business Information Systems

2011 – 2014

- LION Publishers grant (2024); CUNY Center for Community Media Election Reporting Fellowship (2025; Bushwick Daily: 2019, 2020, 2024).
