ALEC MEEKER

Brooklyn, NY | 814-464-3709 | alec@bushwickdaily.com
linkedin.com/in/alecmeeker | github.com/alecmeeeker | White paper: alecmeeker.com/agentic-newsroom-infrastructure

SUMMARY

Applied AI engineer and founder-operator. Acquired a distressed New York City news publication in 2018 and rebuilt it as an AI-native newsroom, owning the transformation end to end, from technical architecture to newsroom operations, and published the methodology as a white paper (alecmeeker.com/agentic-newsroom-infrastructure). Previously an institutional investment analyst, bringing the analytical rigor and stakeholder fluency of institutional finance. Equally experienced and comfortable talking to technical engineering teams and high-level stakeholders. Brings an owner's accountability to forward-deployed work: embed with the customer, scope the ambiguous problem, ship the production system, own the outcome.

PROFESSIONAL EXPERIENCE

BROOKLYN NEW MEDIA, LLC / BUSHWICK DAILY *New York, NY*
Founder, Publisher & CEO *February 2018 – Present*

Applied AI & Production LLM Systems

- **Newsroom Automation:** Architected, shipped, and operates an agentic production line of Python services, deployed across the newsroom's editorial and business operations: it reads 90+ New York outlets and the inbox daily, clusters the day's coverage into distinct stories, drafts local news articles with LLMs, and stages each for human approval; 500+ articles published in its first four months in production, each approved by a human.
- **Full-Stack Deployment:** Designed and built the newsroom's editorial platform on an auditable, idempotent backend: a FastAPI workflow API (100+ endpoints) driving publish gating, fact-check integration, and auto-promotion; a web UI where a human reviews and publishes every article; and RAG search across the news corpus and the publication's own coverage and communications.
- **Fact-Checking:** Engineered a deterministic-first, fail-closed verification desk that checks every machine-drafted article against its sources and blocks publication until fixed. In pre-registered, blind-audited tests on 1,400+ sentences from unseen articles, it caught 97.5% of planted factual errors (195 of 200); it reads sources in other languages by meaning, cutting false blocks on Spanish- and Italian-sourced articles from 8 to 0 (paper: alecmeeker.com/factcheck-research.html).
- **Video to Story:** Built an async Python pipeline that turns a pasted livestream link into a publish-ready package: transcription with speaker ID, quotes verified verbatim against the recording, an LLM-drafted article, and social assets, gated on human approval.
- **Data Foundation:** Designed and operates the PostgreSQL warehouse and APIs underneath: 1.7M+ articles, 240K+ emails, 16M+ semantic-search chunks on pgvector, sub-second retrieval, with per-call LLM observability and cost telemetry.

Commercial & Operating Leadership

- **Owner-Operator Scale:** Acquired Bushwick Daily (bushwickdaily.com) in 2018 on self-conducted valuation analysis, then a second brand in 2019; operate as sole executive with full P&L ownership across advertising, reader subscriptions, consumer product lines, and institutional contracts.
- **Sales:** Owned the full sales cycle on 100+ deals spanning NYC city agencies (Department of Education, Office of the Mayor, MOME), institutions and brands (NYU Langone, Citi Bike, Airbnb); managed a 20+ person organization; produced sponsored events up to 600 people.

Government, Policy & Communications

- **Government Portfolio:** Built and maintain the publication's government relationships across three mayoral administrations, from City Hall to the State Assembly; a preferred city partner and officially designated NYC media outlet.
- **Publication:** Published 7,000+ original articles cited by The New York Times, New York Magazine, Rolling Stone, and Gothamist.
- **Campaign Communications (volunteer, 2026):** Communications director for a contested New York State Assembly primary: messaging, press relations, and rapid response.

ERIE INSURANCE / ERIE INDEMNITY COMPANY *Erie, PA*
Investment Analyst *January 2015 – March 2017*

- **Credit Coverage:** Covered the firm's $200M investment-grade bond portfolio (oil-and-gas, metals-and-mining) within the $13B book; performed relative value analysis for primary issuance pricing and allocation; issued buy/sell recommendations on 20+ credits.
- **Diligence & Committees:** Led due diligence on $100M+ in middle-market private equity, venture capital, mezzanine, and real estate fund commitments with on-site GP evaluations and Burgiss benchmarking; authored the monthly inflation overview for the Asset Allocation Committee.

SKILLS

- **Applied AI / LLMs:** Claude Agent SDK; multi-model LLM orchestration (Anthropic, Google, open-weight models); LangGraph; production multi-agent systems; prompt and context engineering; evaluation frameworks (golden-set regression); agent memory architectures (Mem0, MemGPT); tool use; human-in-the-loop gating; guardrails.
- **Engineering & Data:** Python, SQL, TypeScript/JavaScript; PostgreSQL with pgvector and HNSW; FastAPI, React; asyncio; Celery, Redis; Docker; AWS; Scrapy, Playwright; Claude Code; Git.
- **Finance:** Credit underwriting and sensitivity analysis; DCF and relative value; LP-side fund due diligence; CFA Level I (passed, top quartile all sections).
- **Commercial & Communications:** Enterprise and government sales; procurement and negotiation; government relations; media relations.

EDUCATION & RECOGNITION

UNIVERSITY OF PITTSBURGH *B.S. Finance & Business Information Systems* *2011 – 2014*

- LION Publishers grants (2023, 2024); Center for Community Media Creator in Residence, CUNY; CCM Election Reporting Fellowship.
